

RAVI GOSWAMI

Senior Software Engineer

8958408661 | ravigoswami776889@gmail.com | linkedin.com/in/goswamiravi | github.com/ravigoswami25

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 6+ years of experience architecting and delivering high-performance, scalable backend systems using Node.js, NestJS, and microservices. Collaborated across a cross-functional team of 14 engineers on 3 concurrent product deliveries, contributing to ~95% on-time sprint completion. Delivered a 100x API response time improvement at Supplynote — reducing P99 latency from ~8s to under 80ms — through targeted query optimization and schema redesign. Leverages AI-powered tools including Claude and Cursor to accelerate development workflows, improve code quality, and ship features faster. Deep hands-on expertise across AWS, GCP, and Azure with end-to-end DevOps ownership of CI/CD pipelines, Kubernetes deployments, and production observability. Shipped enterprise-grade solutions for international clients across diverse domains while coordinating directly with US-based stakeholders.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, C, C++

Backend Frameworks: Node.js, NestJS, Express.js

Frontend: Angular, React

Databases: PostgreSQL, MongoDB, DynamoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Azure, Docker, Kubernetes, Jenkins, CI/CD, Heroku, Firebase

Architecture: Microservices, Event-Driven (EventHub, EventBus), REST APIs, Over-the-Air Updates (OTA) via CodePush

AI & Productivity Tools: Claude (Anthropic), Cursor AI — used daily to accelerate coding, review, and documentation workflows

Monitoring & Quality: SonarQube, Datadog, Sentry, Application Performance Monitoring (APM)

Tools & Platforms: Git, JIRA, Bitbucket, Swagger, Metabase, Salesforce, Razorpay

PROFESSIONAL EXPERIENCE

Associate Tech Lead

Mar 2025 – Present

Appinventiv Technologies Private Limited | Noida, India

- Coordinating with a 14-member engineering team across 3 concurrent projects, contributing 50% hands-on development alongside technical planning and cross-functional collaboration.
- Developing and maintaining a NestJS-based microservices platform covering CRM, payment processing, and 6+ business-critical modules, reducing mean time to deploy new features by ~40%.
- Designing event-driven architecture using EventHub and internal EventBus across 10+ services, eliminating ~30% of synchronous bottlenecks and improving system resilience.
- Building and maintaining a custom CodePush Over-the-Air (OTA) update server for mobile apps, reducing app release turnaround from 3-5 days to under 4 hours and enabling zero-downtime hotfixes.
- Optimizing CI/CD pipelines (Jenkins + Docker + Kubernetes), cutting average deployment time by 50% and reducing production incidents by ~35% through improved staging gates.
- Enforcing code quality standards via SonarQube — reducing critical code smells by 60% over 3 sprints — and integrating Datadog APM with sub-5-minute alert response SLA.
- Designing and maintaining dual-database schemas (PostgreSQL + MongoDB) supporting 500K+ records with sub-200ms query performance via strategic indexing and query profiling.
- Using Claude and Cursor AI daily to accelerate code generation, debugging, and PR reviews — reducing boilerplate effort by ~30% and improving documentation quality across the team.
- Collaborating directly with US-based clients on technical reviews and sprint demos, consistently achieving 9/10 NPS across 4 active engagements.

Node.js Developer

Jul 2024 – Mar 2025

TLC Digitech Pvt. Ltd. | Delhi, India

- Developed and maintained RESTful APIs for room booking, table reservations, and food ordering, integrated with Angular, React, and Mule frameworks — serving 50K+ monthly active users.
- Implemented Google Wallet integration for digital pass generation and automated expiration workflows, reducing manual hospitality check-in time by ~25%.
- Integrated Razorpay payment gateway processing Rs.5Cr+ in monthly transaction volume with 99.9% uptime and PCI-compliant security controls.
- Delivered Salesforce CRM to PostgreSQL data-sync pipeline, eliminating ~8 hours/week of manual reconciliation effort for the operations team.
- Deployed production-grade hospitality solutions for global clients including The Leela, Club Marriott, and Radisson, rolled out across 5 countries.

Software Development Engineer

Nov 2021 – Jul 2024

Supplynote (Adcount Technologies Pvt. Ltd.) | Noida, India

- Achieved 100x reduction in API response times (from ~8s to under 80ms P99) by eliminating expensive nested lookups, restructuring MongoDB schemas, and applying compound indexing.
- Designed MongoDB sharding strategy supporting 10x data growth (500K to 5M+ records) with no degradation in read/write performance.
- Built full-stack features (Node.js + Angular) across 3 major product releases, each delivered on schedule and adopted by 1,000+ restaurant and F&B businesses.
- Configured Kubernetes auto-scaling to handle 3x traffic spikes; leveraged AWS EC2 and S3 with horizontal and vertical scaling for cost-efficient infrastructure management.
- Integrated Redis caching layer, reducing database read load by ~45% and improving average API response time by ~60% across high-traffic endpoints.

Software Development Engineer

Oct 2020 – Oct 2021

KNNX Corp (DLT Labs Technologies) | Hyderabad, India

- Built RESTful APIs using Node.js and Express.js powering interactive front-end dashboards for logistics and supply chain clients.
- Developed reusable UI components (HTML, CSS, JavaScript, Node.js) contributing to a shared component library adopted across 3 product teams.
- Established CI pipelines via Jenkins and Docker, reducing manual deployment steps by ~70% and improving release reliability.
